

GENERAL INFORMATION

At last a fisheye additive that does not need to be used in every coat. Use KE170 to correct fisheye or crater defects. Works with lacquer, urethane, polyurethane, acrylic urethane, acrylic enamel, etc. A must have product for your paint shop.

NOTE: Do individual testing with other company's paint products.

CAUTION: May not correct major silicone contamination. In that case, use a silicone oil - which will be required throughout the job.

1. USING KRATOR ELIMINATOR (KE170)

Add 1/2 - 2 capfuls of KE170 Krator Eliminator per mixed quart. Use only when necessary. Once the problem is corrected you do not need to continue using KE170.

NOTE: KE170 is a very unique product that works in ALL coatings to reduce fisheyes.
